

Name: _____

CAESAR CIPHER – one of the easiest ways to encrypt (as well as crack) your message! All you do is shift each letter in your message a certain number of spaces. You can go in either direction, but for these, you'll always go FORWARD to encrypt, and BACKWARDS to decrypt.

Example: **thisissecret** would look like this in code, if it were shifted 3 letters: **wklvlvvhfuhw**

To crack it, then, you'd just have to move it BACK three letters. Easy!

Try the codes below, shifting the number before each message. Hint: circle the letters you think are correct!
